PRODUCTION PROCESS

Fermentation is a natural process in which yeasts and bacteria transform sugars into acids and aromatic compounds. For this traditional Mexican drink, water extracted from the lechuguilla agave heart is combined with the agave piña and cane sugar, and fermented in wooden barrels for 25 to 35 days. Fermentation is then stopped with a natural, mushroom-derived preservative, which keeps the drink stable and non-alcoholic.

CONSUMPTION RECOMMENDATIONS

Serving Temperature: Preferably drink it cold
Pairing: Perfect with grilled meats, spicy and seasoned foods, seafood, any type of food
Consumption Mode: Pure, also ideal for mixology
